PROFILE

Full-stack web developer focused on fast, maintainable Laravel builds with user experience that feels effortless. I build reliable websites and internal tools from planning to launch, with emphasis on clean architecture, responsive UI, and long-term maintainability.

CORE SKILLS

Laravel, Livewire, PHP, MySQL, Tailwind CSS, Bootstrap, Vue.js, JavaScript, Git, Docker, Linux, REST APIs

EXPERIENCE

System Analyst (Developer) | University of Mindanao

2024 - Present

Hands-on development role building and improving internal systems and client websites, including ERPs, student portals, and hotel platforms.

- Collaborate with cross-functional teams to analyze requirements and shape practical system solutions.
- Write and maintain features, fixes, and improvements used daily by students and employees.
- Support deployments, environment setup, CI/CD basics, and monitoring while expanding DevOps knowledge.

Web Developer | Freelance

2022 - 2025

Partnered with small businesses and startups to build and maintain websites and web apps that help them reach their goals.

- Designed and implemented responsive interfaces with Tailwind, Bootstrap, Livewire, and Vue.
- Integrated REST APIs, authentication, and background jobs with production observability in mind.
- Led deployments and post-release hardening to keep uptime and performance steady.

Web Developer | Mediaone PH

2022 - 2023

Handled backend development for the Paw Tracer web and mobile app and partnered with the team to keep releases smooth and stable.

- Built Laravel features, authentication, and data workflows powering daily users.
- Coordinated with designers and project managers to scope and deliver milestones on time.
- Optimized database queries and API responses to improve app performance and reduce load times.
